

Fresh Green

The pleasure of a natural sleep.

Hypoallergenic pillow with aloe vera, a natural barrier against bacteria and allergies, which hydrates and maintains the elasticity of the material, providing even more comfort. The multi-perforated structure in Supernova Foams™ Memory allows free circulation of air inside, creating a cool micro-climate around the head, which prevents excessive sweating. This model is ideal for those who prefer to sleep on taller and more robust pillows, yet comfortable, adapting to the cervical contours and securely supporting the base of the head.
